# Wi-Fi Module Specifications and Operating Guidelines

## 1. Minimum specifications for a smartphone:

Android version 5.0 or later IOS version 9.0 or later

## 2. Basic parameters for the Wi-Fi module

| Parameters              | Details                                                                                |
|-------------------------|----------------------------------------------------------------------------------------|
| Network frequency       | 2.400 - 2.4835 GHz                                                                     |
| WLAN standards          | IEEE 802.11 b/g/n<br>(channels 1-14, channels 1-13 for EU/AU, channels 1-11 for US/CA) |
| Protocol stack support  | IPv4/TCP/UDP/HTTPS/TLS/DNS                                                             |
| Security Support        | WEP/WPA/WPA2/AES128                                                                    |
| Network type support    | STA/AP/STA+AP                                                                          |
| Maximum RF Power        | 18.5 dBm                                                                               |
| Frequency of blue teeth | 2.402 - 2.480 GHz                                                                      |
| Blue tooth RF power     | 9 dBm                                                                                  |

## 3. Operational guidelines.

Please take the simple guidelines instructions below as a reference.

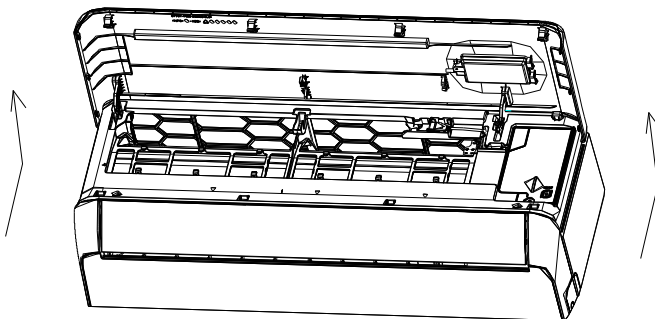

| operation Steps | operation Elements                      | New account | Reinstall the APP (recorded before) |
|-----------------|-----------------------------------------|-------------|-------------------------------------|
| Step 1          | Download and<br>Install the application | YES         | YES                                 |
| Step 2          | Activate APP                            | YES         | YES                                 |
| Step 3          | Registration Account                    | YES         | NO                                  |
| Step 4          | Login                                   | YES         | YES                                 |
| Step 5          | Add device to control                   | YES         | The registered device will remain.  |

### Note

If you have registered the account and added the device before, when you reinstall the APP again and log in, the added device will remain.

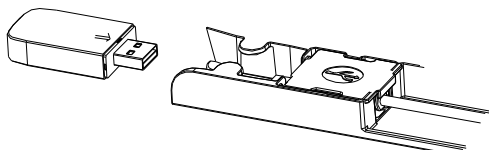

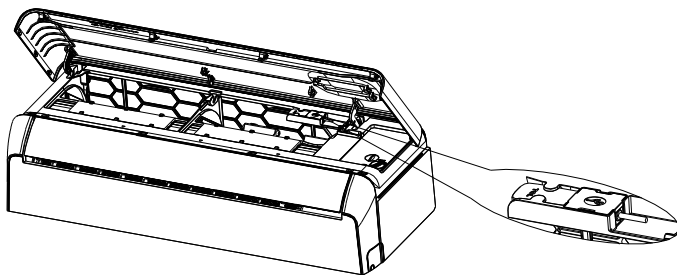

## Install the Wi-Fi module (optional)

1. Open the indoor unit panel.

2. Remove the USB Wi-Fi cover, follow the arrow D and insert the USB Wi-Fi module in the Reserved USB slot on the chassis.

HiO and And rt the USB Wi-Fi module in the

## Download and install the app

**SmartLife-SmartHome**

### For Android smartphones

Method 1: Scan the QR code with a browser scanner, download and install the app. Method 2: Open the Google Play Store on your smartphone and search for "Google Play Store".

"SmartLife-SmartHome", download and install the APP.

### For iOS smartphones

Method 1: Scan the QR code and follow the prompts to enter "AppStore", download and install the APP.

Method 2: Open Apple's "AppStore" on your smartphone and search for "SmartLife-SmartHome", download and install the APP.

#### **Note:**

*Please enable Storage/Location/Camera permissions for this APP during installation. Otherwise, it will have some problems during operation.*

# Activate APP

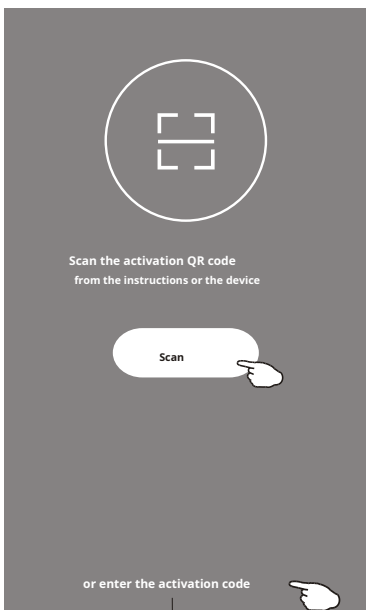

The first time you use the app, you will need to activate it.

1. Launch the "Smart Life" APP on your smartphone.

**SmartLife-SmartHome**

2. Method 1: Tap the "Scan" button and scan the QR code Activation Method 2:  
tap "or enter activation code" at the bottom of the screen,  
then enter the activation code and tap "CONFIRM".

or enter the activation code

\*\*\*\*\*

CANCELCONFIRM

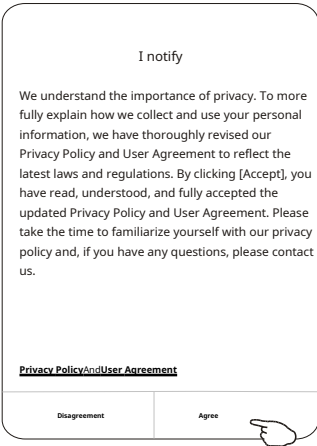

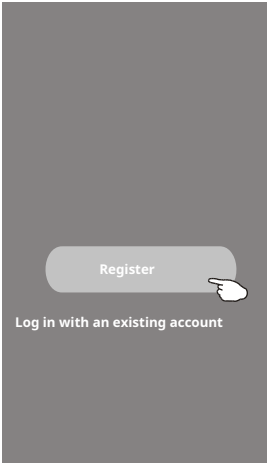

Activate QR code and activation code

*Note Without the QR code or activation code,  
you can't activate the APP  
and use it, keep them safe.*

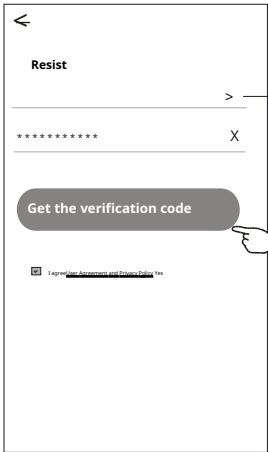

# Registration

1. If you don't have an account, tap the "Register" button.
2. Read the Privacy Policy and tap "I Accept."

3. Tap ">" and choose your country.
4. Enter your email address.
5. Tap the "Get Verification Code" button.

Search for the country or swipe the screen up/down to find and choose the country.

Enter your email address here

# Registration

- 6. Enter the verification code you received by email.
- 7. Set the password with 6-20 characters including letters and numbers.
- 8. Tap "Done".

## Add Device

### There are 3 methods to add the device. Mode 1-CF

1. Turn on the indoor unit, no need to start the air conditioner.
2. Click the "+" in the upper right corner of the Home screen or tap "Add Device" in the room that has no devices.
3. Tap the "Air Conditioner (BT+Wi-Fi)" logo.
4. Follow the prompts on the next screen to reset the Wi-Fi module, then Select "Confirm device reset" and tap "Next".
5. Enter the Wi-Fi password that is the same as the one on your connected smartphone, then tap "Next".
6. You can see the percentage of the connection process, At the same time, "PP", "SA", "AP" light up in turn on the internal display. "PP" means "Searching the router" "SA" means "connected to the router" "AP" means "connected to the server"

Esistono 3 metodi per aggiungere il dispositivo.

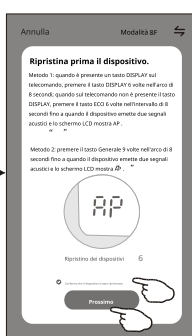

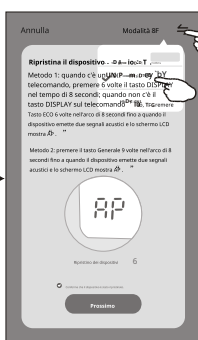

### Modalità 2-AP

1. Accendere l'unità interna, non è necessario avviare il condizionatore d'aria.
2. Fai clic su "+" nell'angolo in alto a destra della schermata "Home" o tocca "Aggiungi dispositivo" nella stanza che non ha dispositivi.
3. Toccare il logo "Condizionatore d'aria 91% LX' Fi)".
4. Tocca nell'angolo in alto a destra e scegli "Modalità AP" quindi seguire i commenti sullo schermo per ripristinare il modulo LX' Fi, quindi selezionare "Conferma il ripristino del dispositivo" e toccare "Avanti".
5. Inserisci la password del LX' Fi che è la stessa del tuo smartphone connesso, quindi tocca "Avanti".
6. Leggere attentamente le istruzioni e toccare "Connetti ora".
7. Nella schermata delle impostazioni di rete, seleziona "SmartLife-\*\*\*\*" e tocca "<".
8. Puoi vedere la percentuale del processo di connessione, allo stesso tempo "PP", "SA", "AP" si illumina a turno sul display interno.

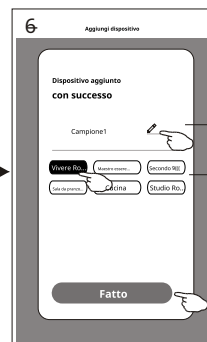

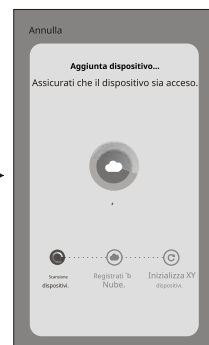

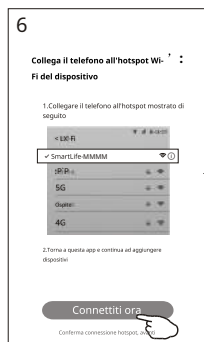

"PP" significa "Ricerca nel router"

"SA" significa "connesso al router"

"AP" significa "connesso al server"

Inserire la password

Rinomina il dispositivo

Seleziona il posizione stanza

## Add Device

There are 3 methods to add the device.

### Mode 3-Bluetooth

1. Turn on the indoor unit, no need to start the air conditioner.

2. Click "+" in the upper right corner of the "Home" screen or tap

"Add device" to the room that has no devices.

3. Tap the "Air Conditioner (BT+Wi-Fi)" logo.

4. Make sure your smartphone's blue tooth is available.

5. Tap in the top right corner and choose "Bluetooth"

Then follow the on-screen prompts to reset the Wi-Fi module, then select "Confirm" that the blue tooth has been reset" and tap "Next".

6. Select one of the found devices and tap "+"

7. Enter the Wi-Fi password that is the same as the one of your connected smartphone, then tap "Next".

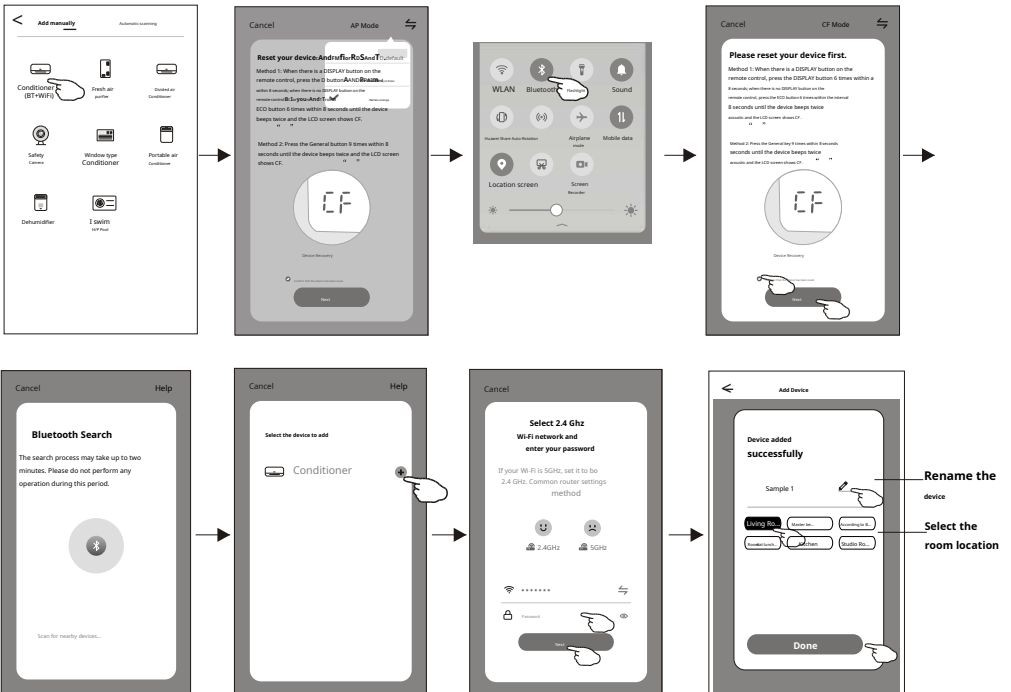

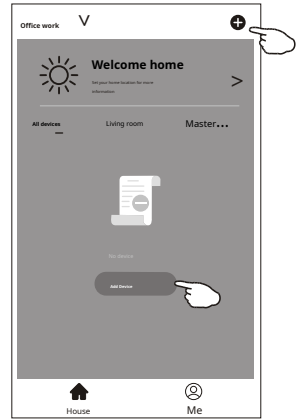

8. You can see the percentage of the connection process, at the same time

"PP", "SA", "AP" lights up in turn on the internal display.

"PP" means "Searching the router" "SA"

means "connected to the router" "AP"

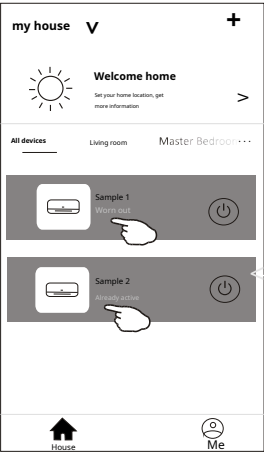

means "connected to the server"

# Air conditioner control

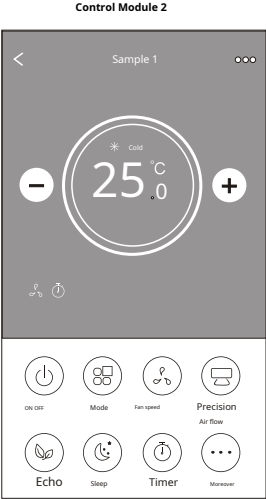

The device control screen will appear automatically after adding the device.

The device control screen will be displayed manually by tapping the device name on the home screen.

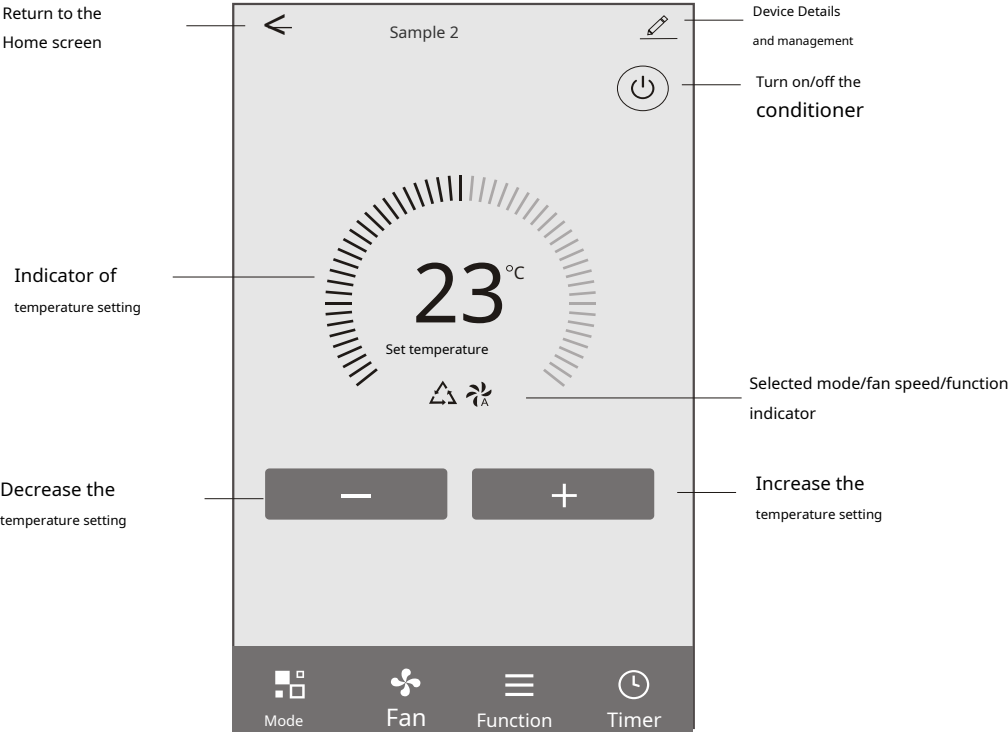

**Note:**

There are two different control methods based on different software or firmware versions of the Wi-Fi module. Please read the manual carefully based on the actual control interface.

Control Module 1

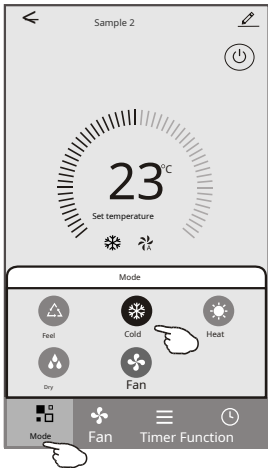

The main control interface

Air conditioner control

Control Module 1-Mode Setting

- 1. Tap Mode to bring up the Mode screen.
- 2. Select one of the Feel/Cool/Heat/Dry/Fan modes.
- 3. Touch anywhere around the set temperature to cancel the mode setting.

Control Module1-Select fan speed

- 1. Tap Fan to bring up the Fan screen.
- 2. Select one of the fan speeds High/Medium/Low/Auto.
- 3. Touch anywhere around the set temperature to cancel the selection.

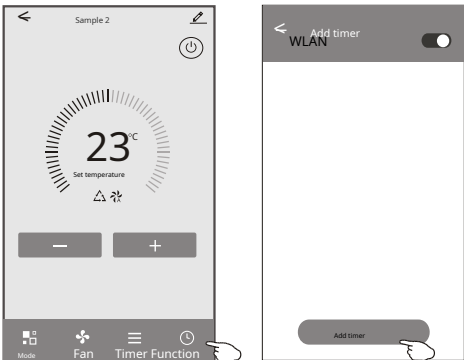

Control Module 1-Function Setting

- 1. Tap Function to bring up the Function screen.
- 2. Select one of the Sleep/Turbo/ECO functions.
- 3. Select UP-DOWN/LEFT-RIGHT for swing automatic with UP-DOWN/LEFT-RIGHT direction.
- 4. Touch anywhere around the set temperature to cancel the function setting.

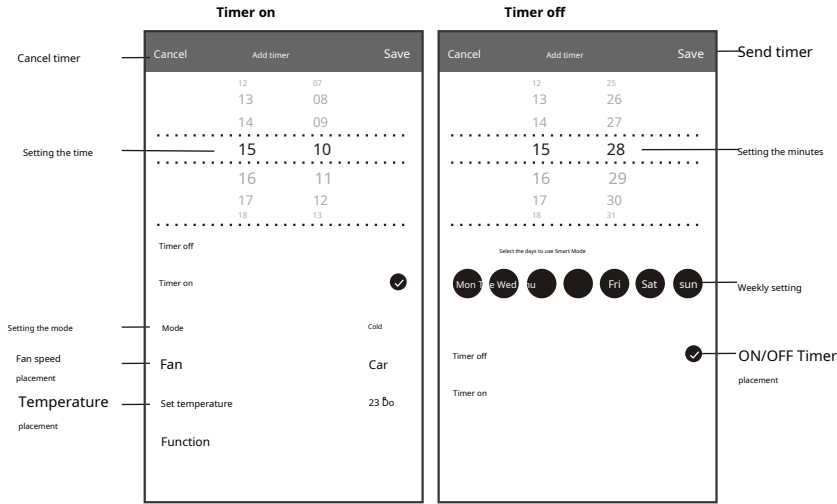

Control Module 1-Add Timer

- 1. Tap Timer to bring up the Add Timer screen.
- 2. Tap Add Timer.

Control Module 1-Add Timer

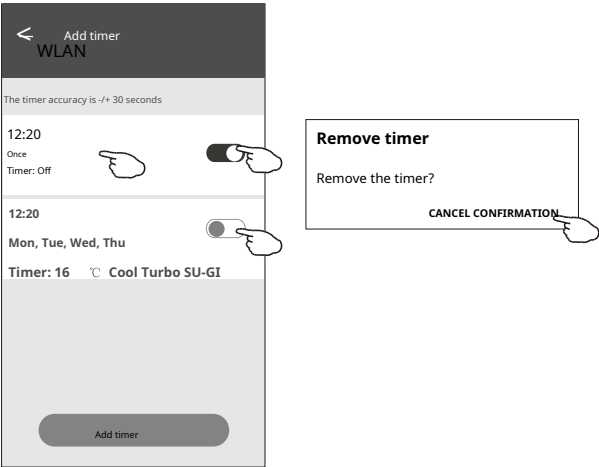

- 3. Select the time, select the repeat days and Timer on/off.
- 4. Select Mode/Fan Speed/Function and select the setting temperature for Timer on.
- 5. Tap Save to add the timer.

Control Module 1 - Timer Management

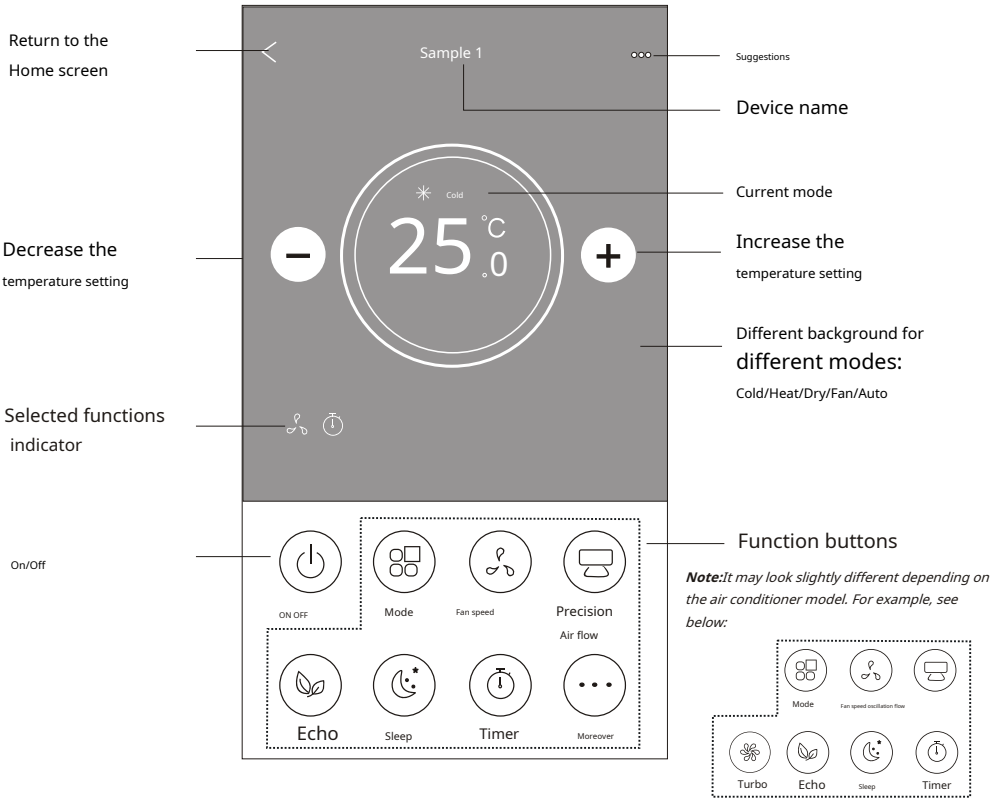

- 1. Tap the timer bar to edit the timer as the process of adding the timer.
- 2. Click the switch to enable or disable the timer.
- 3. Press and hold the timer bar for about 3 seconds and the Remove Timer screen will appear, tap CONFIRM and remove the timer.

Control Module 2

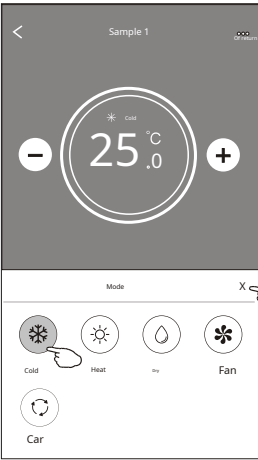

The main control interface

Air conditioner control

Form2 Control - Setup Mode

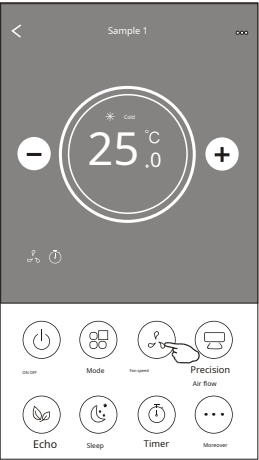

- 1. Tap the Mode button.
- 2. There are 5 modes in the Mode screen, tap one button to set the air conditioner operating mode.
- 3. Tap the X button to return to the main control screen.
- 4. The mode and wallpaper will change on the screen.

**Note:**Please read the details of each mode in the user manual for more comfortable control.

Control Module 2 - Fan Speed Selection

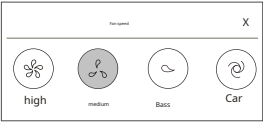

- 1. Tap the Fan Speed button.
- 2. Select the desired fan speed and tap it.
- 3. Tap the X button to return to the main control screen.
- 4. The selected fan speed indicator will appear on the screen.

| Mode | Fan speed  |
|------|------------|
| Cold | All speeds |
| Fan  | All speeds |
| Dry  |            |
| Heat | All speeds |
| Car  | All speeds |

**Note:**  
The fan speed can't be set to Dry mode.

**Note:**The fan speed screen may look slightly different, Depending on the air conditioner model.  
**Example:**

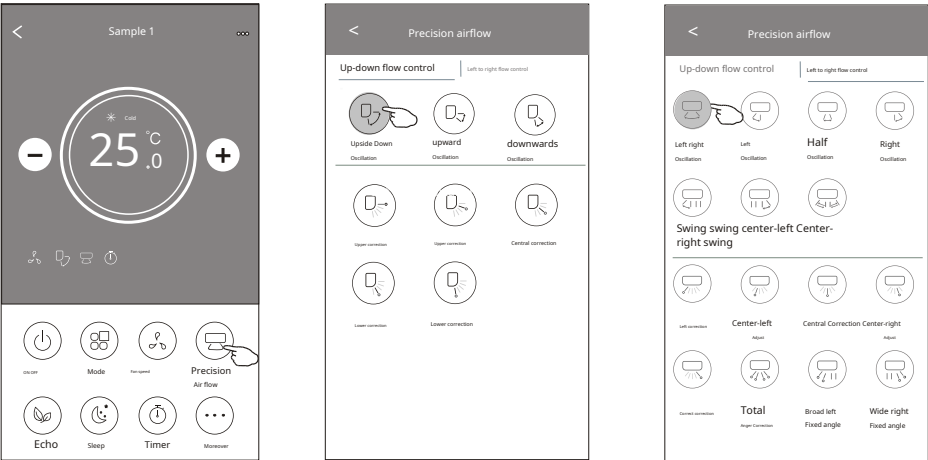

# Air conditioner control

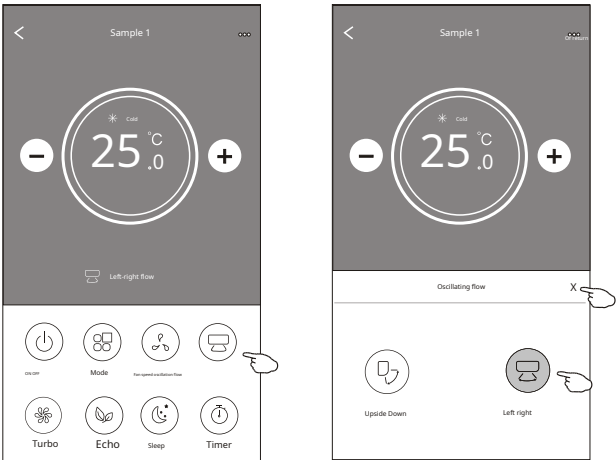

## Control Module 2 - Air Flow Control

- 1. Tap the Precision Airflow button or the Oscillating Airflow button.
- 2. Select the desired airflow and tap it.
- 3. Tap the X button to return to the main control screen.
- 4. The selected airflow indicator will appear on the screen.

**Note:**For some models without automatic left-to-right wind, if you activate it, you will hear a beep, but no action.

**Note:**The main control screen and the airflow screen may appear slightly different depending on the air conditioner model. Examples are as follows:

Control form2-ECO function

- 1. For Eco function, just touch the button to activate the function, the button will light up and the indicator will appear on the screen.
- 2. Tap again to disable the function.
- 3. Temperature controlled for some models of air conditioners: in  
Cooling mode, the new set temperature will be  $\geq 26^{\circ}\text{C}$ .  
In heating mode, the new set temperature will be  $\leq 25^{\circ}\text{C}$ .

| Heat | Yes         |
| Car  |             |

ECO is disabled in Fan/Dry/Auto mode.

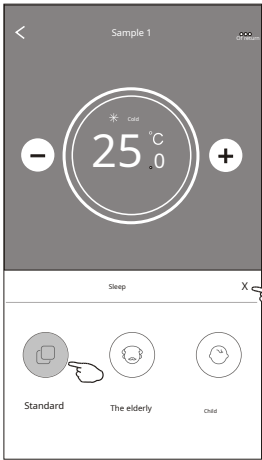

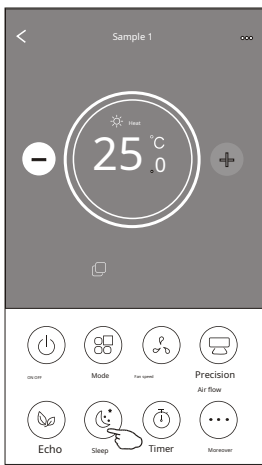

**Note:**The main control screen and ECO control method may appear slightly different depending on the air conditioner model. Example below:

**Note:**  
ECO is also disabled in Turbo/Sleep mode for some air conditioner models.

19

Control Module 2 - Sleep Function

- 1. Tap the Sleep button.
- 2. Choose the desired sleep mode and tap it.
- 3. Tap the X button to return to the main control screen.
- 4. The selected sleep mode indicator will appear on the screen.

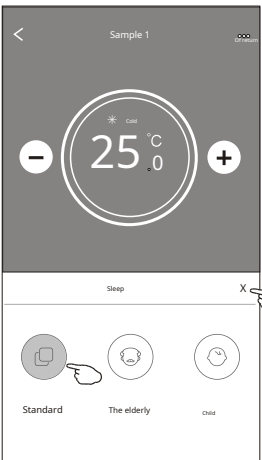

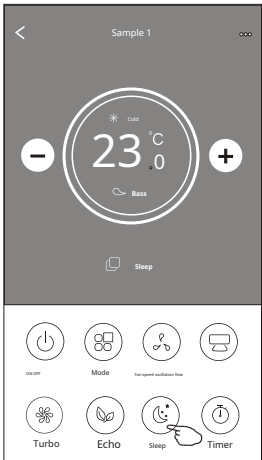

| Modality | Sleep enabled |
|----------|---------------|
| Cold     | Yes           |
| Fan      |               |
| Dry      |               |
| Heat     | Yes           |
| Car      |               |

Sleep is disabled in Fan/Dry/Auto mode.

Note:

The main control screen may look slightly different depending on the air conditioner model. For example, see the following:

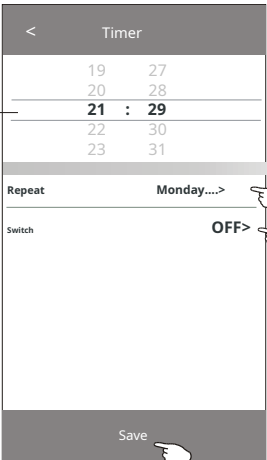

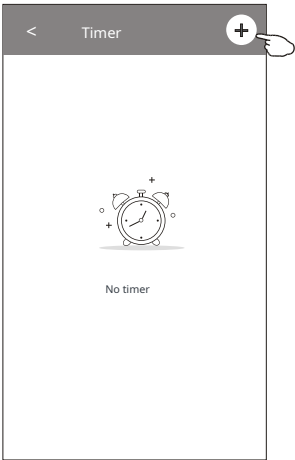

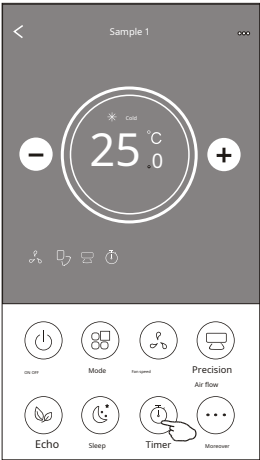

Note:

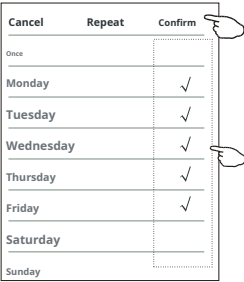

Sleep mode is also disabled in Turbo/  
Sleep for some air conditioner models.

Control form2-Set Timer(on)

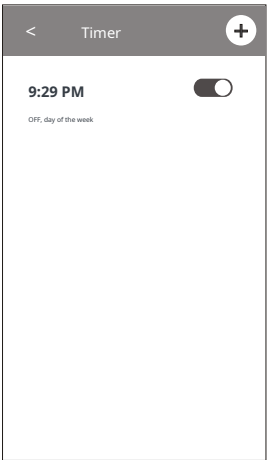

- 1. Tap the Timer button.
- 2. Tap + in the upper right corner of the Timer main screen.
- 3. Choose Now/Repeat/Off, then tap Save.
- 4. The timer (off) will appear on the main Timer screen.

Tap Repeat > then tap the desired repeat days or Once, then tap Confirm Selection.

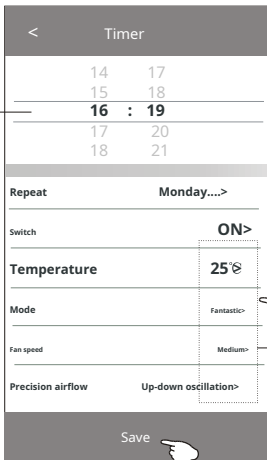

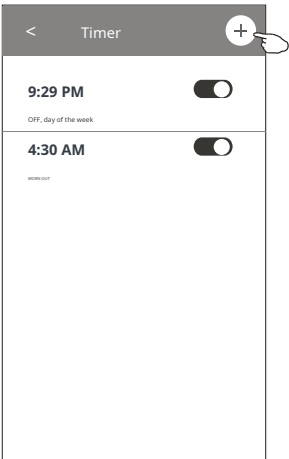

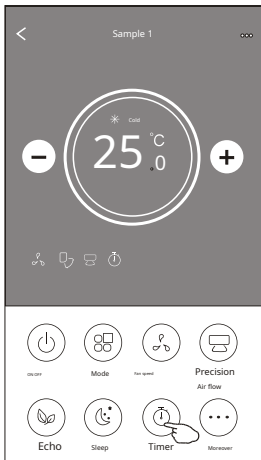

Tap Switch > then swipe the screen to choose ON and Confirm.

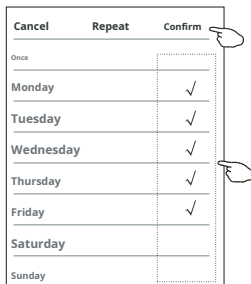

Control Module 2-Timer Setting(off)

- 1. Tap the Timer button.
- 2. Tap + in the upper right corner of the Timer main screen.
- 3. Set time/date repeat/switch (ON)/temperature/mode/ fan speed/airflow as desired and then tap Save.
- 4. The timer will appear on the main Timer screen.

Swipe up or down  
down to select the time

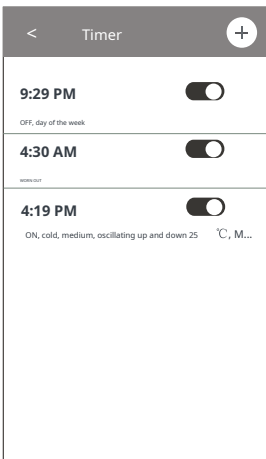

Tap Repeat > then tap the desired repeat  
days or Once, then tap Confirm  
Selection.

Tap Switch > then slide the  
screen to choose ON  
and Confirm.

Touch Temperature/Mode/Fan Speed/  
Airflow > one by one, then set as  
desired as mentioned in the previous chapter  
and tap Confirm Setting.

Control Module 2 - Timer Management

1.Change the timer setting:

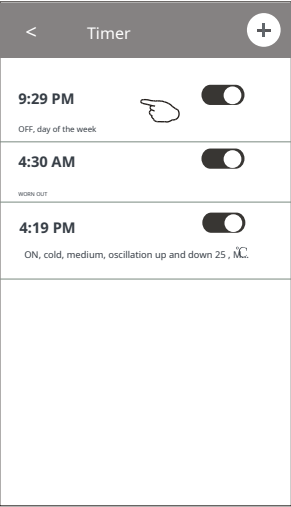

Tap anywhere on the timer list bar except the switch bar to access the timer settings screen, change the setting, and then tap save.

2. Enable or disable the timer:

Tap the left side of the switch to disable the timer. Tap the right side of the switch to enable the timer.

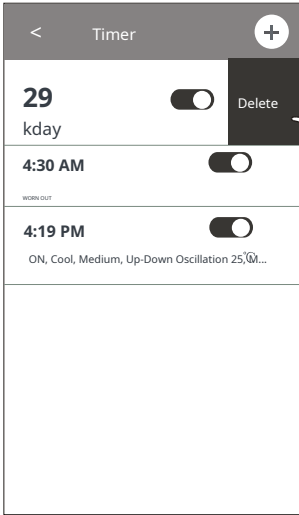

3. Delete the timer:

Swipe the Timer list bar from right to left until the Delete button appears, then tap Delete.

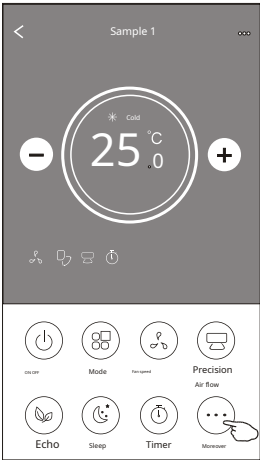

Swipe left to disable the timer.

Swipe right to enable the timer.

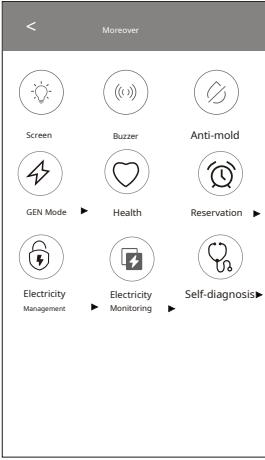

Control Module 2 - Other functions

1. Tap the More button to activate additional features if it appears on the screen.

**Note:**  
Some air conditioner models do not  
are available't have the plus button.

**Note:** Appearance may vary, some icons will be hidden if  
your air conditioning does not have this function or is not  
enabled in the current mode.

2. Touch "  "to turn on/off the internal LED display.

3. Touch"  "to turn the buzzer on/off during operation via Wi-Fi APP.

4. Tap the "  " button to activate the Anti-Mold function, if available on the screen.

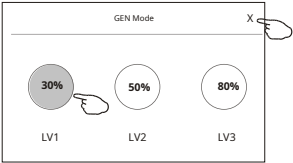

After the air conditioning is turned off, it will start to dry, reduce the residual humidity and prevent the formation of mold, at the end of the function, it will automatically turn off.

5. Tap the "  " button to enable/disable the healthy function, if available on the screen.

Activates the antibacterial ionizer function. This function is only available for models with an ionizer generator.

6. Tap the "  " button, if available on the screen.

In this mode, you can choose one of three power levels. The air conditioner will maintain the appropriate power to save energy.

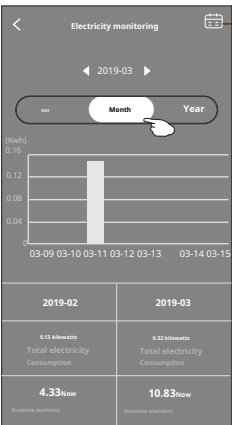

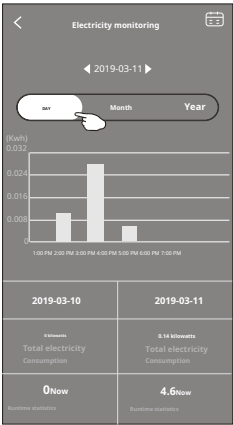

Control Module 2 - Other functions

7. Tap the "Electricity Monitor" button if it is available on the screen.

In this function, you can monitor the electricity consumption of the air conditioner.

Electricity Monitoring

You can tap this button to bring up the calendar, then select the date.

8. Tap the "Self-Cleaning" button, if available on the screen.

Check the details of the self-cleaning function in the User Manual.

9. Tap the "8°C Heat" button, if available on the screen.

This function helps to keep the room temperature above 8°C. Check the details of the 8°C Heat function in the User Manual.

10. Tap the "Booking" button, if available on the screen.

You can set the time, repeat day, temperature, mode, fan speed, airflow as you like. want and then tap Save to activate the feature.

The air conditioner will automatically reach your settings at the appointment time.
